Future Mall – Task 3: Protection Plan

Digital Egypt Cubs Initiative – Level 2

Sub-task 3.1: Protection Table

System	Possible Risk	Protection Method
Free Wi-Fi	An attacker could access visitors' or employees' data through an unsecured Wi-Fi connection.	Use WPA2/WPA3 encryption and a separate guest network with a strong Wi-Fi password.
Cashier Device	Unauthorized access to the cashier device could expose sales information or allow changes to transactions.	Use individual employee accounts with strong passwords and automatic screen locking.
Mall Website	The website could be attacked and changed or taken offline.	Keep the website software updated and use secure administrator accounts with strong passwords and regular backups.

Sub-task 3.2: Passwords and Employee Tips

Exercise password (created only for this project):

FutureMall#2026

Password policy check:

Policy Condition	How the password satisfies it
At least 12 characters	It contains 15 characters.
At least one uppercase letter	It contains uppercase letters F and M.
At least one lowercase letter	It contains lowercase letters.
At least one number	It contains 2026.
At least one special character	It contains #.

Three Employee Safety Tips

1. Lock your cashier or work device whenever you leave it unattended.
2. Never share your work password with another employee.
3. Report suspicious emails, links, or login requests to the system administrator.

FUTURE MALL

EMPLOYEE CYBER SAFETY

LOCK YOUR WORK DEVICE WHEN YOU LEAVE IT.

NEVER SHARE YOUR WORK PASSWORD.

REPORT SUSPICIOUS EMAILS, LINKS, OR LOGIN REQUESTS.

Stay alert. Protect Future Mall.
